Bathtub and Counter Top Care

The bathtub(s) and counter top have been resurfaced. The following is recommended to help maintain resurfaced area:

Do not use bleach, oven cleaner, or abrasive cleaners such as Comet, etc.

Do not use Scotch Brite Sponge or any other type of abrasive cloth/scrubber.

Do not use a bathmat or bath tub oblique on resurfaced tub. The suction cups will cause the adhesion of the material to weaken over time, making the surface lift up and peel. If bathmat is necessary, remove after using.

Do not use Drano in the bathtub drain. It will affect the finish of the tub.

Do use a non-abrasive spray cleaner such as Lysol or 409 to clean resurfaced areas. Other gel cleaner may also be used. Lysol tub and tile cleaner works well.

Do use a standard sponge or cloth for cleaning.

Also avoid using any soap products that contain dye. This can cause stains over time, especially for bathtubs.
